

Polyface is a family owned, multi-generational, pasture-based, local-market farm based in Swope, VA with a mission to develop environmentally, economically, and emotionally enhancing agricultural prototypes and facilitate their duplication throughout the world.

Polyface offers a weekly protein add-on to the Project GROWS Vegetable CSA.

What to Expect: Pork brats, ground beef, whole chickens, and breakfast sausage. Other meats might also be available. Meats are guaranteed every week and eggs are guaranteed every other week.

Value and Variety: While the type of meat will change from week to week, the monetary value of the share will be the same from week to week. Some cuts are more expensive than others, and some meats are more expensive than others. Therefore, typical shares may include either a whole Polyface chicken (just meat) or Polyface eggs and sausage (eggs and meat).

“Your meats are the best we’ve ever had.” S.G.

“These eggs just jump up and slap you in the face.” F.J.
